## Recommendation for Nirojan Srikandarajah

DEPARTMENT OF  
COMPUTER SCIENCE  
SELMA LAGERLØFS VEJ 300  
DK 9220 AALBORG EAST

To whom it may concern

JENI PAAY  
ASSOCIATE PROFESSOR  
T +45 9940 7590  
F +45 9815 9798  
JENI@CS.AAU.DK

Nirojan Srikandarajah has through his bachelor and Master's education in Informatics at Aalborg University worked interdisciplinary on developing IT from different perspectives. This includes analysis, design, development and evaluation. It also includes the documentation and presentation of project work. He has designed and developed IT products starting with the user as the center and finishing with a product of in-depth design and high usability. Nirojan understands the role that users can play in the development of IT products. He has through his education attended courses at the Department of Computer Science, Department of Communication and Psychology, Department of Economy and Department of Architecture, Design and Media Technology, which have provided him with the necessary competences to work in an interdisciplinary way across multiple projects.

Furthermore, Nirojan has studied abroad at the University of Melbourne, in collaboration with researchers at the department of the Department of Computing and Information Systems on his 9<sup>th</sup> semester. As a member of a development team of 4, he worked with 3 academic researchers from Melbourne to create a smoking cessation application that was field tested with users to get feedback on it. This project was very well received by both the hosting University and the government partner, Quitline Victoria. This work has been accepted for presentation at the Nordic Computer Human Interaction conference in October 2014, which is evidence of the international quality and importance of this research. Nirojan was then able to take what he had learned from the 9<sup>th</sup> semester and deliver an excellent high quality research project on Smoking Cessation for his final Masters project. This project scored the highest possible grade of 12.

I know Nirojan very well through our collaboration as a supervisor on many projects at the education of Informatics. He is a very approachable and competent member of a team. He is hard working, a good problem solver, an excellent interface designer and developer, a skilled presenter and writes well. His results throughout his education are at a very satisfactory level, and his final results are excellent.

I confidently and wholeheartedly recommend Nirojan Srikandarajah for future work within Human-Computer Interaction and software design. If there are any questions, I can be contacted on email as listed above.

Yours sincerely

Dr Jeni Paay
